, it is very seldom that we pause to think about the many stages of planning and labor that came before these monuments were erected, The Unfinished Obelisk is a rare opportunity to consider what this process might have been like and just how difficult it was to shape and carve the great stone blocks that make up Egypt's many monuments.

This huge obelisk would have stood 140 feet in height, the largest even in Egypt. It was to be carved from the Red Aswan granite that decorate many of Egypt's greatest monument and for which the city is famous. This greatest of all of Egypt's monoliths, however, was never finished. At a late stage in its formation, a flaw in the rock was discovered and it was abandoned.

This beautiful temple complex is one of the most picturesque in all of Egypt. It sits on Aglika Island just south of the old Aswan Dam and you must ride a water taxi to the island to get to the ruins. The temple was moved to its current location following the construction of the High Dam, which threatened to submerge it permanently.

After being lost from civilization for a while, the Abu Simbel Temples was rediscovered in 1813 by Swiss explorer John Lewis Burckhardt. The temples had long been forgotten and the sands of the desert had covered all but the tops of the heads of the huge statues in front of their entrances.

Djoser Complex (Saqqara Pyramid)

This huge site, in fact, hosts the tombs of the period just before the ancient Kingdom up to those of the Greek period.

By far the most famous structure within this area is the stepped pyramid of Djoser, dating back to the third dynasty, (2667- 2448 BC), is considered the oldest Egyptian structure, large, built entirely of stone. The pyramid was built for King Zoser (or Djoser) by his architect Imhotep.

2nd site to visit will be ;

Old Cairo & Coptic Cairo.

Coptic Cairo is a unique area with Old Cairo that has a concentration of Christian churches and other sites that date from the centuries between the decline of the pharaonic religion and the arrival of Islam when Egypt had a Christian majority. Coptic Cairo is largely built around the fort of Babylon on upon the remains of its walls.

There are also six churches here that date back to the early Christian era. The Hanging Church, or the Church of the Virgin Mary, was built in the 9th century to 'hang' high upon the walls of Babylon. The effect of this 'hanging' is now diminished significantly as ground levels have risen around the walls.

Originally built on the site of an old mausoleum, local and foreign merchants have been trading at Khan el-Khalili souk since the 14th century. It is Egypt's most famous market.

Trading in the souk dates from the 14th century, but its elaborately-carved monumental gates and grid-like alleyways were constructed in the 16th century under Egypt's last powerful Mamluk ruler
